

## PRACTICAL NO 4 CODE:

```
package newp3;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.firefox.FirefoxDriver;
import org.openqa.selenium.firefox.FirefoxOptions;

public class n1 {
    public static WebDriver driver;
    //
    static String driverPath = "C:\\Users\\DELL\\Downloads\\geckodriver.exe";
    public static void main(String[] args) {
        // TODO Auto-generated method stub
        // TODO Auto-generated method stub
        System.out.println("hi");
        System.out.println("Starting Selenium demo...");

        // Set the path to the GeckoDriver executable
        System.setProperty("webdriver.gecko.driver", "C:\\Users\\DELL\\Downloads\\geckodriver.exe");

        // Create FirefoxOptions instance
        FirefoxOptions options = new FirefoxOptions();
        // Add any desired options here, for example:
        // options.setHeadless(true); // Run Firefox in headless mode (no GUI)

        // Initialize FirefoxDriver with options
        driver = new FirefoxDriver(options);
        try {
            // Navigate to a webpage
            driver.get("https://www.google.com/");
            driver.manage().window().maximize();

            // Perform any additional actions if needed

        } catch (Exception ex) {
            System.out.println("An error occurred: " + ex.toString());
        } finally {
            // Quit the driver to close all browser windows and end the session
            if (driver != null) {
                driver.quit();
            }
        }
    }
}
```

## PRACTICAL NO 5 CODE:

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.firefox.FirefoxDriver;
import org.openqa.selenium.firefox.FirefoxOptions;
public class LoginAutomationTest {
    public static WebDriver driver;
    //
    static String driverPath = "C:\\Users\\DELL\\Downloads\\geckodriver.exe";
    public static void main(String[] args) {
        // TODO Auto-generated method stub

        // Set the path to the Gecko driver executable
        System.setProperty("webdriver.gecko.driver", "C:\\Users\\DELL\\Downloads\\geckodriver.exe");

        // Create FirefoxOptions instance
        FirefoxOptions options = new FirefoxOptions();
